EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Yang on March 8, 2005.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: See attachment. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

EXAMINER'S STATEMENTS OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Claims 4-7 and 11-13, which have been renumbered claims 1-7, respectively, are allowable over prior art references because related references do not disclose narrowing the frequency of a received incoming signal, amplifying the signal, rejecting an image of the incoming signal, distributing the incoming signal into different channels in which the signals are amplified during distribution, processing the signals in each channel, wherein only one channel is active to save power during processing, and combining the signals in each channel. Claims 15, 17, and 18, which have been renumbered claims 8-10, respectively are allowable over prior art references because related

references do not disclose distributing an input signal to at least two channels, wherein each channel includes a Gilbert cell, an automatic gain control circuit, a transconductance amplifier, and filters disposed in each channel to output the signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
